

CAC Shanghai Corporation

Client References

Mr. Christian Pfalz (IT Systems Engineer)

- Company** : Tesla CRM Software GmbH [www.tesla.com]
Project : CRM Workgroup Module
Description : Enhanced the company's CRM software solution by adding a workgroup module, enabling better communication. The improvement enables users to create and view appointments for both internal and external contacts. An added feature allows people creating appointments to view the availability of prospective participants to a meeting before creating an appointment to ensure availability. This new feature hopes to help small- to medium sized companies to better manage their business relationships.
Technology : OS – Windows 9X/2000; Database – SQL Server; Tools – Java

Mr. Yoshimasa Torii (Consultant – Financial Systems Division)

- Company** : Sumitomo Trust Bank [www.sumitomotrust.co.jp]
Project : Retirement Fund Management System
Description : A 150 man-month project being undertaken to develop a new retirement fund system for Sumitomo's customers. Functions include systems management, account management, and accounts receivable/payable system
Technology : VB.net, SQL Server

Mr. Akihiro Shiotani (Manager – Information Systems)

- Company** : Yamanouchi Pharmaceutical Company, Ltd [www.yamanouchi.com]
Project : Distribution System
Description : Converted the existing system to become Internet based. Sales agents are now able to access the company's central database for resource information, sales channels identification, and distribution results confirmation.
Technology : OS – Windows 2000 Server; Database – Oracle; Tools – VB, ASP

Mr. Koichi Takeo (Manager – Information Systems)

- Company** : American Family Life Assurance Company [www.aflac.com]
